

CZEDRIX BARCENA

FULL STACK DEVELOPER

Davao City, Philippines | +63 949 862 2545 | czedrix@gmail.com

my-portfolio-five-rho-11.vercel.app | github.com/czedrix | linkedin.com/in/czedrix-barcelona

PROFESSIONAL SUMMARY

Full stack developer building production web, mobile, and AI products from database design and REST APIs through responsive interfaces, automated testing, CI/CD, and deployment. Experienced with Laravel, Nuxt, Vue, React, Next.js, FastAPI, and Kotlin across e-commerce, booking, internal operations, and AI-assisted applications.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, Vue, Nuxt, React, Next.js, Tailwind CSS, Quasar

Backend: PHP, Laravel, Node.js, Express, Python, FastAPI, REST APIs, background workers, queues

Mobile and AI: Kotlin, Jetpack Compose, Capacitor, LLM APIs, ONNX computer vision

Data and delivery: PostgreSQL, MySQL, Redis, SQLite, Supabase, Docker, AWS Lightsail, nginx, Bitbucket Pipelines

Quality and tools: Playwright, Vitest, PHPUnit, pytest, Postman, Git, GitHub, Bitbucket, Jira

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

Oct 2024 - Present

W Soft Labs

- Build and maintain production REST APIs with authentication, relational data stores, background workers, and queues using Laravel, Node/Express, and FastAPI.
- Ship TypeScript front ends in Vue, Nuxt, React, and Next.js, including server-side rendering, English and Korean localization, and offline-capable PWA support.
- Develop and release a native Android application with Kotlin and Jetpack Compose.
- Integrate LLM APIs, on-device ONNX computer-vision models, and real-time updates with Pusher and Server-Sent Events.
- Own delivery through Playwright, Vitest, PHPUnit, and pytest test suites, Bitbucket Pipelines, Docker, and AWS Lightsail deployments behind nginx.

Assistant Web Developer Supervisor

Dec 2022 - Aug 2024

R Web Solutions Corp.

- Built and maintained custom Laravel content management systems for brochure, e-commerce, catalogue, and booking websites.
- Developed responsive interfaces with HTML, CSS, JavaScript, Tailwind, Vue, and Quasar, and converted web applications to mobile apps with Capacitor.
- Designed Laravel REST APIs and integrated Stripe, PayMongo, Maya, Lalamove, and Transportify for payments and delivery workflows.
- Collaborated with clients and the development team on requirements, releases, maintenance, and production support.

Web Developer Intern

Feb 2022 - Apr 2022

Provincial Government of Davao de Oro

- Built a vehicle transport application module with Laravel, MySQL, Bootstrap, and Git as part of a shared modular codebase.

SELECTED PROJECTS

Sentrix | Laravel, Vue 3, Pinia, Tailwind, MySQL

Multi-branch storefront and staff console for a security retailer. Branch-scoped inventory and pricing remain consistent through checkout, where stock is reserved transactionally. Seven staff roles use 17 server-checked permissions, with sensitive records limited by branch.

Forkcast | Next.js, TypeScript, Prisma, PostgreSQL

SaaS nutrition product that turns a meal photo into an editable food log. Each account receives a limited number of scans on the free tier, with paid access designed for continued use. Its vision adapter falls back across Anthropic, OpenAI, and Gemini, while personalized targets, nutrition trends, weight history, and logging streaks complete the workflow.

Arawan | Nuxt 4, Vue, Supabase, PostgreSQL, PWA

Mobile-first loan and collections tracker with borrower records, daily collection totals, repayment progress, and a ledger that preserves payment corrections as reversals. Supabase Auth and row-level security restrict records to the owner.

Tindahan | Nuxt 4, Vue, Tailwind, Drizzle, PGLite

Installable store operations app that connects point of sale, inventory, physical counts, reporting, user roles, and audit history. Sales update revenue, cost, profit, and inventory together; Excel import and export support existing stock workflows.

EDUCATION

Bachelor of Science in Information Technology

University of the Immaculate Conception, Davao City | 2018 - 2022

Dean's List, Second Semester 2020 - 2021

Technical Vocational Program

Holy Cross of Davao College, Davao City

With Honors | Most Outstanding IT Student
